letters patent, and surrenders of letters patent, all communications to the Registrar under the Ordinance and these Regulations relating to patents may be signed by and all attendances upon the Registrar may be made by or through an agent duly authorised to the satisfaction of the Registrar. In any particular case, the Registrar may, if he think fit, require the personal signature or presence of an applicant, opponent, or other person.

The Registrar shall not recognise as such agent, or receive communications in respect of any business under the Ordinance from, any person who is not at the time licensed to be a patent agent under the provisions of the Ordinance.

APPLICATIONS FOR THE GRANT OF PATENTS.

9.—(1) An application for a patent, other than a Patent of Addition or a Secret Patent, shall be made on one of the Patents Forms, Nos. 1 or 2 as the case may be. An application for a Patent of Addition shall be made on Patents Forms Nos. 3, 4 or 5, and an application for a Secret Patent on Patents Form No. 6. An application for the grant of a Patent of Addition in lieu of an independent patent shall be made on Patents Form No. 21.

Form of application.
Forms 1, 2, 3, 4, 5, 6, 21.

(2) An application for a patent for an invention communicated from abroad, and an application for a patent made by a person who is not at the time resident in the Colony, shall not be received by the Registrar unless made through a licensed patent agent.

10. In the case of an application for a patent by the legal representative of a person who has died possessed of an invention, the probate of the will, or the letters of administration granted of the estate and effects, or a certified copy of such probate or letters, shall be produced at the Office in proof of the applicant's title to be regarded as legal representative and be supported by such further evidence as the Registrar may require.

Application by representative of deceased inventor.

11. Applications for patents sent through the post shall, as far as may be practicable, be opened and numbered in the order in which the letters containing the same are delivered in the ordinary course of post.

Order of recording applications

Applications left at the Office otherwise than through the post shall be in like manner numbered in the order of their receipt at the Office.

12.—(1) When a specification comprises several distinct matters, they shall not be deemed to constitute one invention by reason only that they are all applicable to or may form parts of an existing machine, apparatus, or process.

One invention.

Where a person making application for a patent has included in his specification more than one invention, the Registrar may require or allow him to amend such application and specification and drawings or any of them so as to apply to one invention only, and the applicant may make application for a separate patent for any invention excluded by such amendment.

Applications for separate patents by way of amendment.

Every such last-mentioned application may, if the Registrar at any

time so direct, bear the date of the original application or such date between the date of the original application and the date of the application in question, as the Registrar may direct, and shall otherwise be proceeded with as a substantive application in the manner prescribed by the Ordinance and by these Regulations.

Where the Registrar has required or allowed any application or specification or drawings or any of them to be amended as aforesaid, such application shall, if the Registrar at any time so direct, bear such date, subsequent to the original date of the application and not later than the date when the amendment was made, as the Registrar shall consider reasonably necessary to give sufficient time for the subsequent procedure relating to such application.

(2) Where the same applicant has put in two or more provisional specifications for inventions which he believes to be cognate or modifications one of the other and the Registrar is of opinion that such inventions are not cognate or modifications one of the other, the applicant may divide the complete specification left in connexion with his applications into such number of complete specifications as may be necessary to enable the applications to be proceeded with as two or more separate applications for patents for different inventions.

Claims.

13. The statement of the invention claimed, with which a complete specification must end, shall be clear and succinct as well as separate and distinct from the body of the specification.

DRAWINGS.

General.

14. Drawings, when furnished, must accompany the provisional or complete specification to which they refer, except in the case provided for by regulation 21. No drawing or sketch such as would require the preparation for the printer of a special illustration for use in the letterpress of the specification when printed may appear in the specification itself.

Requirements as to paper, &c.

15. Drawings must be made on pure white, hot-pressed, rolled, or calendered strong paper of smooth surface, good quality, and medium thickness, without washes or colours, in such a way as to admit of being clearly reproduced on a reduced scale by photography. Mounted drawings may not be used.

Size of drawings and arrangement of figures.

16. Drawings must be on sheets which measure 13 inches from top to bottom and are either from 8 inches to $8\frac{1}{4}$ inches or from 16 inches to $16\frac{1}{2}$ inches wide, the narrower sheets being preferable. A clear margin must be left half an inch from the edges of the sheet

If there are more figures than can be shown on one of the smaller sized sheets, two or more of these sheets should be used in preference to employing the larger size. When an exceptionally large figure is required, it should be continued on subsequent sheets. There is no limit to the number of sheets that may be sent in, but no more sheets should be employed than are necessary. The figures should be numbered consecutively throughout and without regard to the number of sheets. They should be separated by a sufficient space to keep them distinct.

17. Drawings must be prepared in accordance with the following requirements:—

- (a) They must be executed with absolutely black ink.
- (b) Each line must be firmly and evenly drawn, sharply defined, and of the same strength throughout.
- (c) Section lines, lines for effect, and shading lines must be as few as possible, and must not be closely drawn.
- (d) Shading lines must not contrast too much in thickness with the general lines of the drawing.
- (e) Sections and shading must not be represented by solid black or washes.
- (f) They must be on a scale sufficiently large to show the invention clearly, and only so much of the apparatus, machine, &c., may appear as effects this purpose. If the scale is given, it must be drawn, and not denoted by words. No dimensions may be marked on the drawings.
- (g) The figures must be drawn in an upright position in regard to the top and bottom of the sheet.
- (h) Reference letters and numerals, and index letters and numerals used in conjunction therewith, must be bold, distinct and not less than one-eighth of an inch in height. The same letters or numerals must be used in different views of the same parts. Where the reference letters or numerals are shown outside the figure, they must be connected with the parts referred to by fine lines.

Drawings to be suitable for reproduction.

18. Drawings must bear the name of the applicant (and, in the case of drawings left with a complete specification after one or more provisional specifications, the numbers and years of the applications) in the left-hand top corner; the number of sheets of drawings sent, and the consecutive number of each sheet, in the right-hand top corner: and the signature of the applicant or his agent in the right-hand bottom corner. Neither the title of the invention nor any descriptive matter shall appear on the drawings.

Drawings to bear name of applicant, &c., but no descriptive matter.

19. A facsimile or "true copy" of the original drawings shall be filed at the same time as the original drawings, prepared strictly in accordance with these Regulations, except that the reference letters or numerals and leading lines thereto should be in black-lead pencil. In the case of a hand-made drawing this copy may be on tracing cloth.

Copies of drawings.

The words "original" or "true copy" must in each case be marked at the right-hand top corner, under the numbering of the sheet

Marking originals and true copies.

20. Drawings must be delivered at the Office free from folds, breaks, or creases which would render them unsuitable for reproduction by photography.

Condition of drawings on delivery.

21. If an applicant desires to adopt the drawings lodged with his provisional specification as the drawings or part of the drawings for his complete specification, he shall refer to them in the complete specification as those left with the provisional specification.
