During the year under review, thirty three thousand, six hundred and thirty-one (33,631) licences were issued, compared with twenty one thousand six hundred and thirty nine (21,639) licenses issued during the year 2010; an increase of eleven thousand nine hundred and seventy two (11,972) licences. Police in each Division were engaged in the issuing of licences to Goods Vehicle, Hire cars and Mini-buses.

TRAFFIC EDUCATION PROGRAMME

130. The importance of Road Safety Education cannot be overemphasised, thus it was intended to create a change in the attitude of people (all categories of road users) during the year 2011. The Print and electronic media were fully utilised to ensure that the message was circulated both nationally and internationally.

SCHOOL SAFETY PATROLS

131. The School Safety Patrols gave valuable service to the community in which they are found.

137. The Engineering Section continued with the erecting and painting of Traffic Signs and other markings in areas where needed.

CONCLUSION

138. It is evident that speeding by motorists, inattentiveness, and a total disregard of and lack of appreciation for Road Safety were among the principal causes of the high rate of Fatal and other accidents during 2011. An important fact generally overlooked is that of the absence of streetlights in populated areas and this is a great contributory factor to road accidents.

139. The ranks performed creditably despite constraints, shortage of manpower, materials and other equipment. The vigilance of Traffic personnel was sustained on our roads.

140. The efficiency and performance shown by the Traffic ranks will continue to be maintained, to allow for a free flow of traffic and a consequent reduction in the number of accidents on the roads.
